PRESS RELEASE

Montreuil, October 12, 2010.

**Céline Wright creates a giant made-to-measure lamp
for « Nature & Découvertes »**

The Artisan Designer Céline Wright has created a giant paper lamp in collaboration with project chief Frédéric Lunaud at « Nature & Découvertes » and

architect Gwénaél PLESSE from Saguez & Partners, the brand creation and identity consultancy. A big screen in the shape of a leaf with its wooden ribs, 2 metres 20 in diameter spreads a soft vegetal and spacious light in the first new generation « Nature & Découvertes » store at Parly 2. The public opening is on Friday October 15 from 10 AM.

Faithful to her ecological and ethical convictions, always inspired by nature, Céline Wright has created this hand-made lamp out of tough Japanese « shoji » paper at her workshop in Montreuil, near Paris – a marriage of ancestral technique and modern LED technology. « I'm very pleased with this new collaboration. The philosophy of « Nature & Découvertes » is in perfect harmony with my own values and my way of working » says Céline Wright.

Some photos of working methods are available now on the Céline Wright FACEBOOK page or on request.
